

From Dancing Bridges to Burning Soils

Tours of new state-of-the-art labs in the Department
of Civil and Environmental Engineering

Event Guide:

This event explores the fascinating world of Civil and Environmental Engineering which explains why it's more than just bridges and dams. This is an opportunity to visit our new state-of-the-art laboratories and see how they can be used with industry partnerships and collaborative working. The £6M new facility brings together the department's numerous multi-disciplinary laboratories into a single, interdisciplinary unit. This not only consolidates resources, but fosters the interdisciplinary nature of the research required in contemporary civil and environmental engineering, and which contribute to tackling industrial and societal issues.

Lab tours and exhibits will provide delegates with an opportunity to view current research activities, and demonstrate how these integrate with knowledge exchange activities and industry.

Venue & Registration:

Wednesday 30th April

There will be three key timings for the lab tours: 3.30, 4.30 and 5.30. Please book one of the time slots when you register for this event.

The Department of Civil and Environmental Engineering will start the tours at the new Knowledge Exchange Hub in level 5, James Weir Building and will then be guided to the new labs in small groups ([map](#)).

To register please go to

www.engage.strath.ac.uk/event/142/

Audience:

- Companies interested in working with the department in knowledge exchange activities such as consultancy, collaborative research and CPD
- Companies interested in working with students in client-based projects
- Companies interested in using the new laboratories
- Potential new students (MSc, MRes, MPhil, PhD, CPD and Open Access)

Benefits of attending:

- Learn what collaborative work the department and the University can offer
- Learn about the unique laboratory equipment and facilities which are available for use
- Discuss topics for future projects and collaboration
- Learn about Continuing Professional Development (CPD) training opportunities
