

Showcasing Projects with Industry

Event Guide:

It is beneficial for industry and students to collaborate in industrially-relevant projects. This poster presentation and networking event provides an opportunity to share the outcomes of collaborative work with industry. Thirty eight projects will be on show including SME carbon audits, treatment of land contamination, wildlife management and hydrogeology projects overseas. Posters relate to the work of nine different programmes: MEng Civil Engineering; MRes Integrated Pollution Prevention and Control; MSc Applied Economics; MSc Environmental Engineering; MSc Environmental Entrepreneurship; MSc Hydrogeology; MSc Sustainability and Environmental Studies; MSc Wind Energy Systems, and PhD programme. Attendees will vote for the best project and poster.

Venue & Registration:

Wednesday 30th April 2014
2.00pm – 4.00pm
CEE KE Hub, Level 5, James Weir Building ([map](#)).

To register and for further information please go to www.engage.strath.ac.uk/event/147/

Audience:

- Companies currently working with students on client-based projects
- Companies interested in working with the University
- Staff who already contribute to the programme
- New staff who are interested in contributing to the programme in future
- Past, present and potential students (including distance learning)

Benefits of attending:

- Learn what collaborative work the University can offer your company
- Discuss carbon audits, treatment of land contamination, wildlife management and hydrogeology projects
- Discuss topics for future projects
- Learn how to get the most from industry-based projects
- Engage with industrial contacts
- Share best practice with project supervisors
