Lisa Crampin

Specialist Speech and Language Therapist, working at the Royal Hospital for Children in Glasgow, NHS Greater Glasgow and Clyde. She is part of the West of Scotland Cleft Centre. In addition to her extensive experience providing support for people with cleft palate +/- cleft lip, she is actively involved in research. She is also one of the few Cleft Specialist Speech and Language Therapists in the UK who uses ultrasound visual biofeedback therapy in her usual practice for cleft-related speech difficulties.

Dr. Maria Dokovova

A lecturer and a registered Speech and Language Therapist at the University of Strathclyde. Maria has a PhD in Phonetics and studies the speech and the listening of people who have disordered speech or who speak more than one language. She also uses ultrasound tongue imaging and has enjoyed working with the children and young people with cleft palate +/- cleft lip who volunteered at the SonoSpeech project.
