

## Allosteric Drug Design

Wednesday, 30th April 2014 (11:00 am - 1:00 pm)

Venue: SIPBS Hamnett Wing, Room: HW111-114

This event aims to bring together academic and industrial researchers with interest in allosteric drug design and development with a view to identifying collaborative and funding opportunities.

11.00 – 11.30 Arrive, registration, tea / coffee

11.30 – 13.00 Seminar:

Dr Gerard van Westen (EBI-ChEMBL) “Allosteric modulators in ChEMBL”

Professor Scapozza (University of Geneva) “Allosterism: A way to address paradoxical pathway activation and resistance to targeted therapies”

Dr Laurent Galibert (Alpine Institute for Drug Discovery) “Challenges associated with functional approaches to the discovery and development of small-molecule allosteric modulators”

13.00 – 14.00 Networking Lunch
