

Body Image and Eating Disorders: Future Research Priorities

Event Guide:

This event aims to gather a working group of experts in the field of body image and eating disorders to explore current research in the field and future research priorities. There will be a chance to discuss the most pressing questions which still need to be answered through research and how we could best work collaboratively to explore them.

The planned outcome of the event is to agree on a research agenda for the field of body image and eating disorders, which would guide future research and funding applications by scholars and industry experts alike.

Lunch will be provided at the event.

Venue & Registration:

Thursday 5th May 2016
Registration and refreshments from 10.30am
Event 11.00am - 2.00pm including lunch

Scottish Universities Insight Institute
Collins Building
22 Richmond Street
Glasgow G1 1XQ ([map](#))

To register please go to:
www.engage.strath.ac.uk/event/276/

Audience:

Professionals from the third sector and healthcare industry working in the field of body image and eating disorders along with researchers and community advocates for eating disorder organisations.

Benefits of attending:

- Hear from academic and industry experts about the latest developments in body image and eating disorders.
- Take part in discussions to inform new collaborative research.
- Identify new approaches, ideas and areas of interest for future funding applications.
